The DRB120/240-3 series supports the growing trend for simple and economically priced 3-phase input DIN power supplies for industrial and process control applications. The series combines low cost, reliability and compact dimensions with energy saving efficiencies of up to 94%. Conservatively rated electrolytic capacitor temperatures offer improved field life-times of typically 10 years. Available in two power levels, 120W and 240W, the series provides a choice of 12V, 24V and 48V outputs. All models can provide a peak power of 20% for up to 2s to handle capacitive loading. A low energy inrush current level avoids nuisance tripping of circuit breakers. Units can be connected in parallel to provide more power or for redundant applications. A DC Good relay, remote on/off and a choice of models with either screw or push-in wire terminals.

Features	Benefits
• High Efficiency, up to 94%	• Lowers Operating Costs and Improves Thermal Performance
• Narrow Case Widths	• Occupies Less Space on the DIN rail
• Curve B Radiated and Conducted EMI	• Reduced Electrical Noise in the System
• Long E-Capacitor Life (typically 10 Years)	• Improved Field Life
• Low Off-Load Power Consumption	• Saves Energy
